Instapak® Complete™

Foam Packaging System

The Protective Power of Instapak® Foam Delivered in Efficient, Versatile Tubes

Instapak® Complete™ System

Reduce Cube Size and Minimise Packaging Material with Small Diameter Tubes

On-Demand Flexible Protection

The Instapak® Complete™ foam packaging system from Sealed Air creates Continuous Foam Tubes (CFTs) and foam filled bags using a range of Instapak® high performance packaging foams that provide superior protection with minimal foam usage. A compact design, custom program and just-in-time accumulation makes the Instapak® Complete™ system a perfect fit for any size packaging operation.

Advanced Instapak® CFT Technology

The Instapak® Complete™ system features a variety of new advancements that improve on our Instapak® CFT technology.

- Flow controlled dispensing allows the system to produce small diameter foam filled tubes, ranging from 2.5cm to 12.5cm.
- Perforations can be programmed to suit individual needs and applications.
- User friendly touch key control panel allows operators to choose from 24 pre-programmed CFT or foam bag combinations.

Wind it Up and Let it Go

Our optional accumulator attachment feeds Instapak® CFT material into a cushion bin, where it can be batched for later use or delivery to multiple workstations. These rolls can then be distributed to decentralised workstations or stored for peak usage.

Get More By Using Less

Capitalising on the ability to produce small diameter tubes, the Instapak® Complete™ can deliver significant protection while allowing the packer to reduce cube size and overall shipping volume. By reducing material usage, users can also save on dimensional weight shipping fees and the environmental resources necessary to transport larger volumes.

Specifications

System Dimensions:
74cm x 66cm x 48cm
Weight without film roll:
36.7 kg.
Electrical Power:
380-415 VAC, 16A,
3 phase, N, earth
Receptacle type:
CEE 17 (5- Pole, 16A)
UL and CE approved
